

Sturdy monitor stand for flatscreens.

Q-riser 90

Research

An optimum monitor position leads to lesser discomfort and complaints to the neck (Kumar 1994 McKinnon 1994, Marcus 2002). Positioning the monitor too low can lead to strong bending of the neck and therefore higher muscle tension of the neck muscles. But a position which is too high (higher than eye level) can also lead to problems. The optimum position increases the productivity by 10% (Sommerich et al, 1998).

1

1. Compact

2. Storage space

2

Fixed height: 9 cm

Suitable: for flatscreen monitors

Cable management: integrated

Material: clear acrylic

Maximum weight: 15 kg.

Specifications

Dimensions:	380 x 95 x 200 mm (W x D x H)
Weight:	910 g
Product code:	BNEQR90

Health & Safety Regulations

Council Directive 90/270/E the minimum safety and health requirements for work with display screen equipment. The screen must swivel and tilt easily and freely to suit the needs of the operator.
